

Here are two examples of HTML tables:

1. **\*\*Basic Table:\*\***

```
```html
<table>
  <tr>
    <th>Name</th>
    <th>Age</th>
    <th>City</th>
  </tr>
  <tr>
    <td>John Doe</td>
    <td>25</td>
    <td>New York</td>
  </tr>
  <tr>
    <td>Jane Smith</td>
    <td>30</td>
    <td>London</td>
  </tr>
</table>
```
```

In this example, there's a simple table with three columns (Name, Age, City) and two rows of data.

2. **\*\*Product Catalog Table:\*\***

```
```html
<table>
  <thead>
    <tr>
      <th>ID</th>
      <th>Product</th>
      <th>Category</th>
      <th>Price</th>
    </tr>
  </thead>
  <tbody>
    <tr>
      <td>1</td>
      <td>Laptop</td>
      <td>Electronics</td>
      <td>$800</td>
    </tr>
    <tr>

```

```
<td>2</td>
<td>Bookshelf</td>
<td>Furniture</td>
<td>$150</td>
</tr>
<tr>
<td>3</td>
<td>Headphones</td>
<td>Audio</td>
<td>$50</td>
</tr>
</tbody>
</table>
...
```

In this example, there's a table with a header row specifying the columns (ID, Product, Category, Price), and multiple rows of product data in the body.
